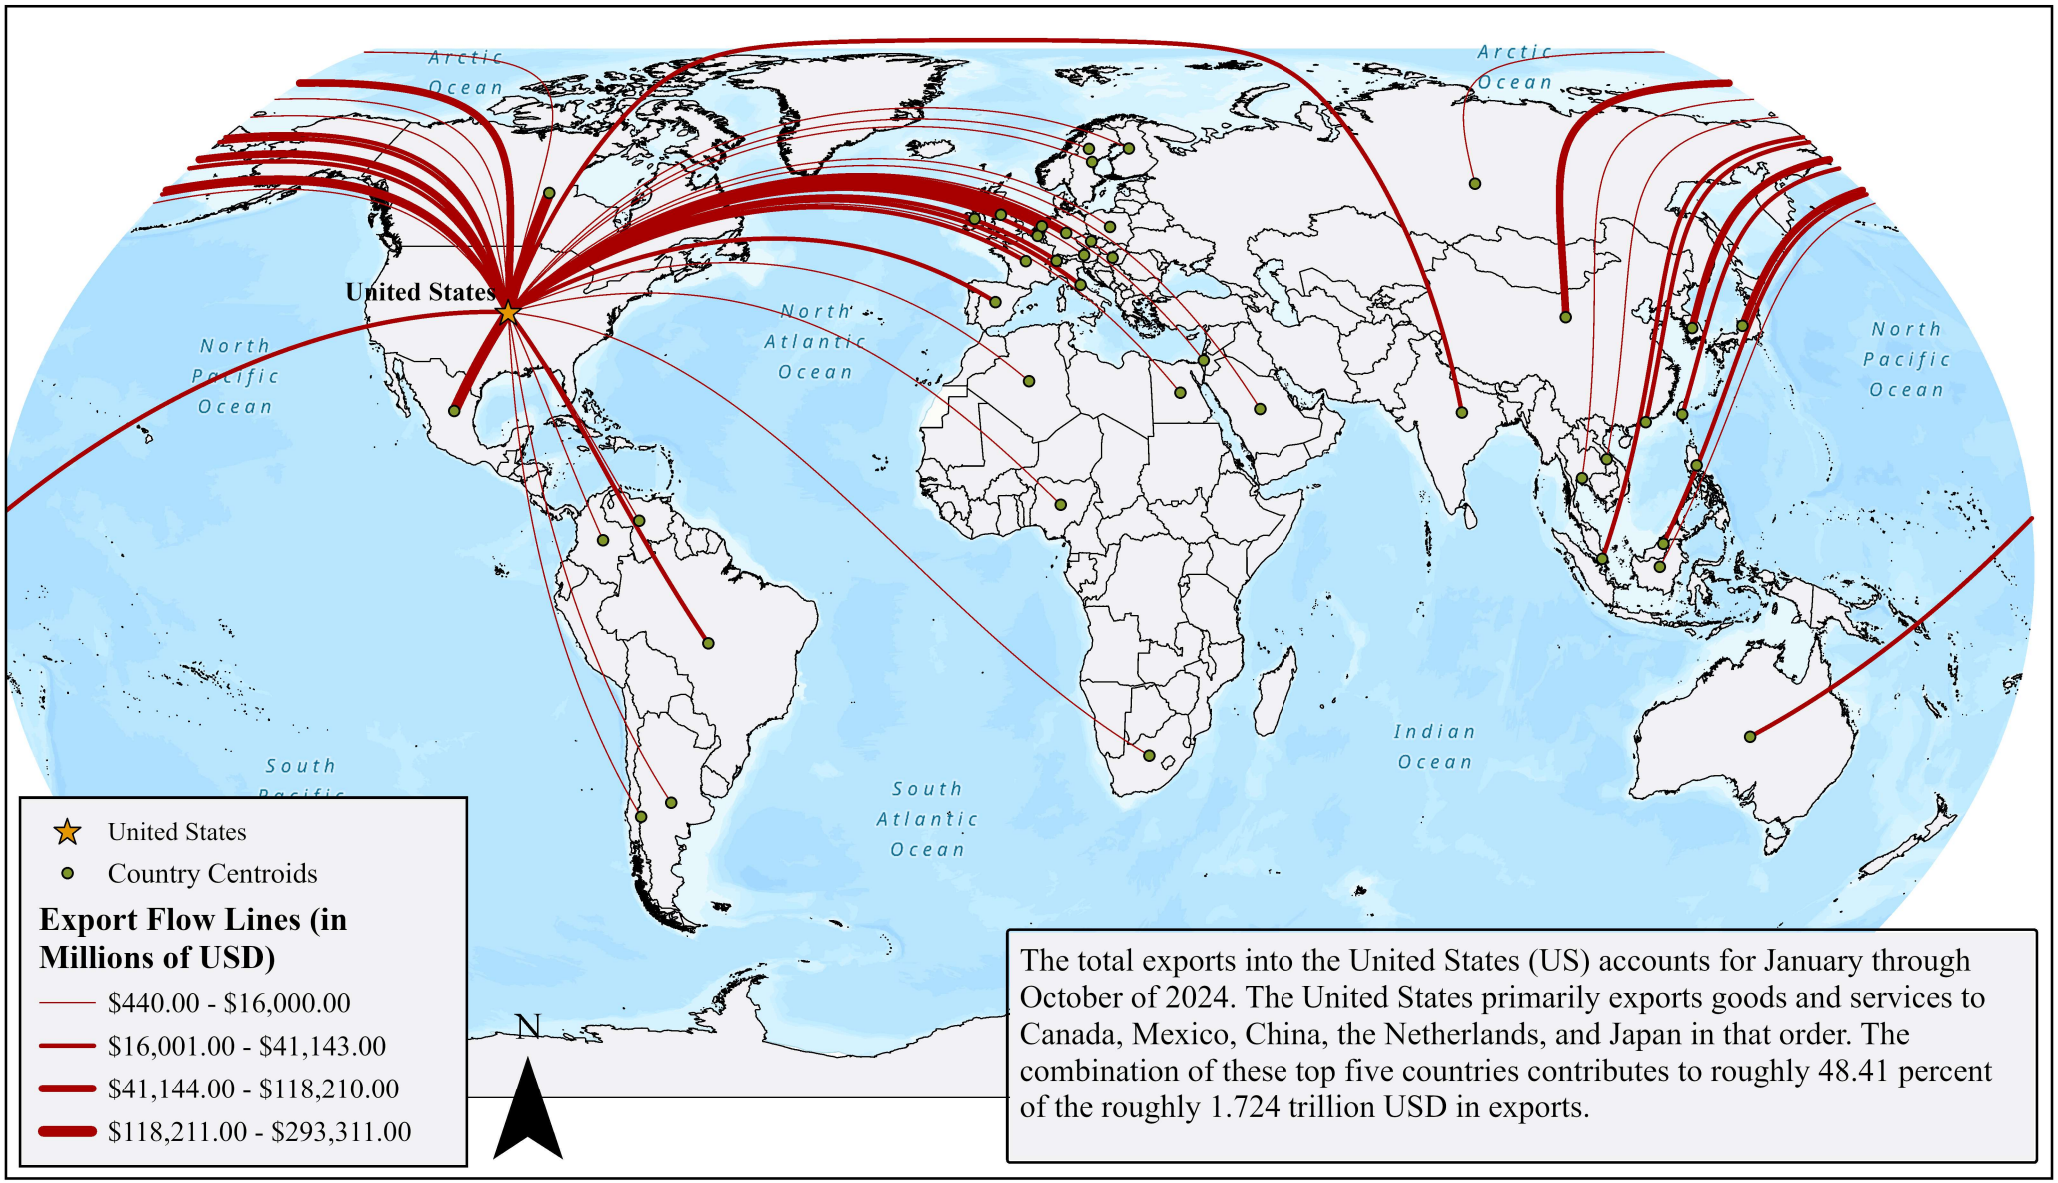
United States Flow Map Visualizing the 2024 Top Destinations of Exports in Millions of United States Dollars (USD)



The total exports into the United States (US) accounts for January through October of 2024. The United States primarily exports goods and services to Canada, Mexico, China, the Netherlands, and Japan in that order. The combination of these top five countries contributes to roughly 48.41 percent of the roughly 1.724 trillion USD in exports.
