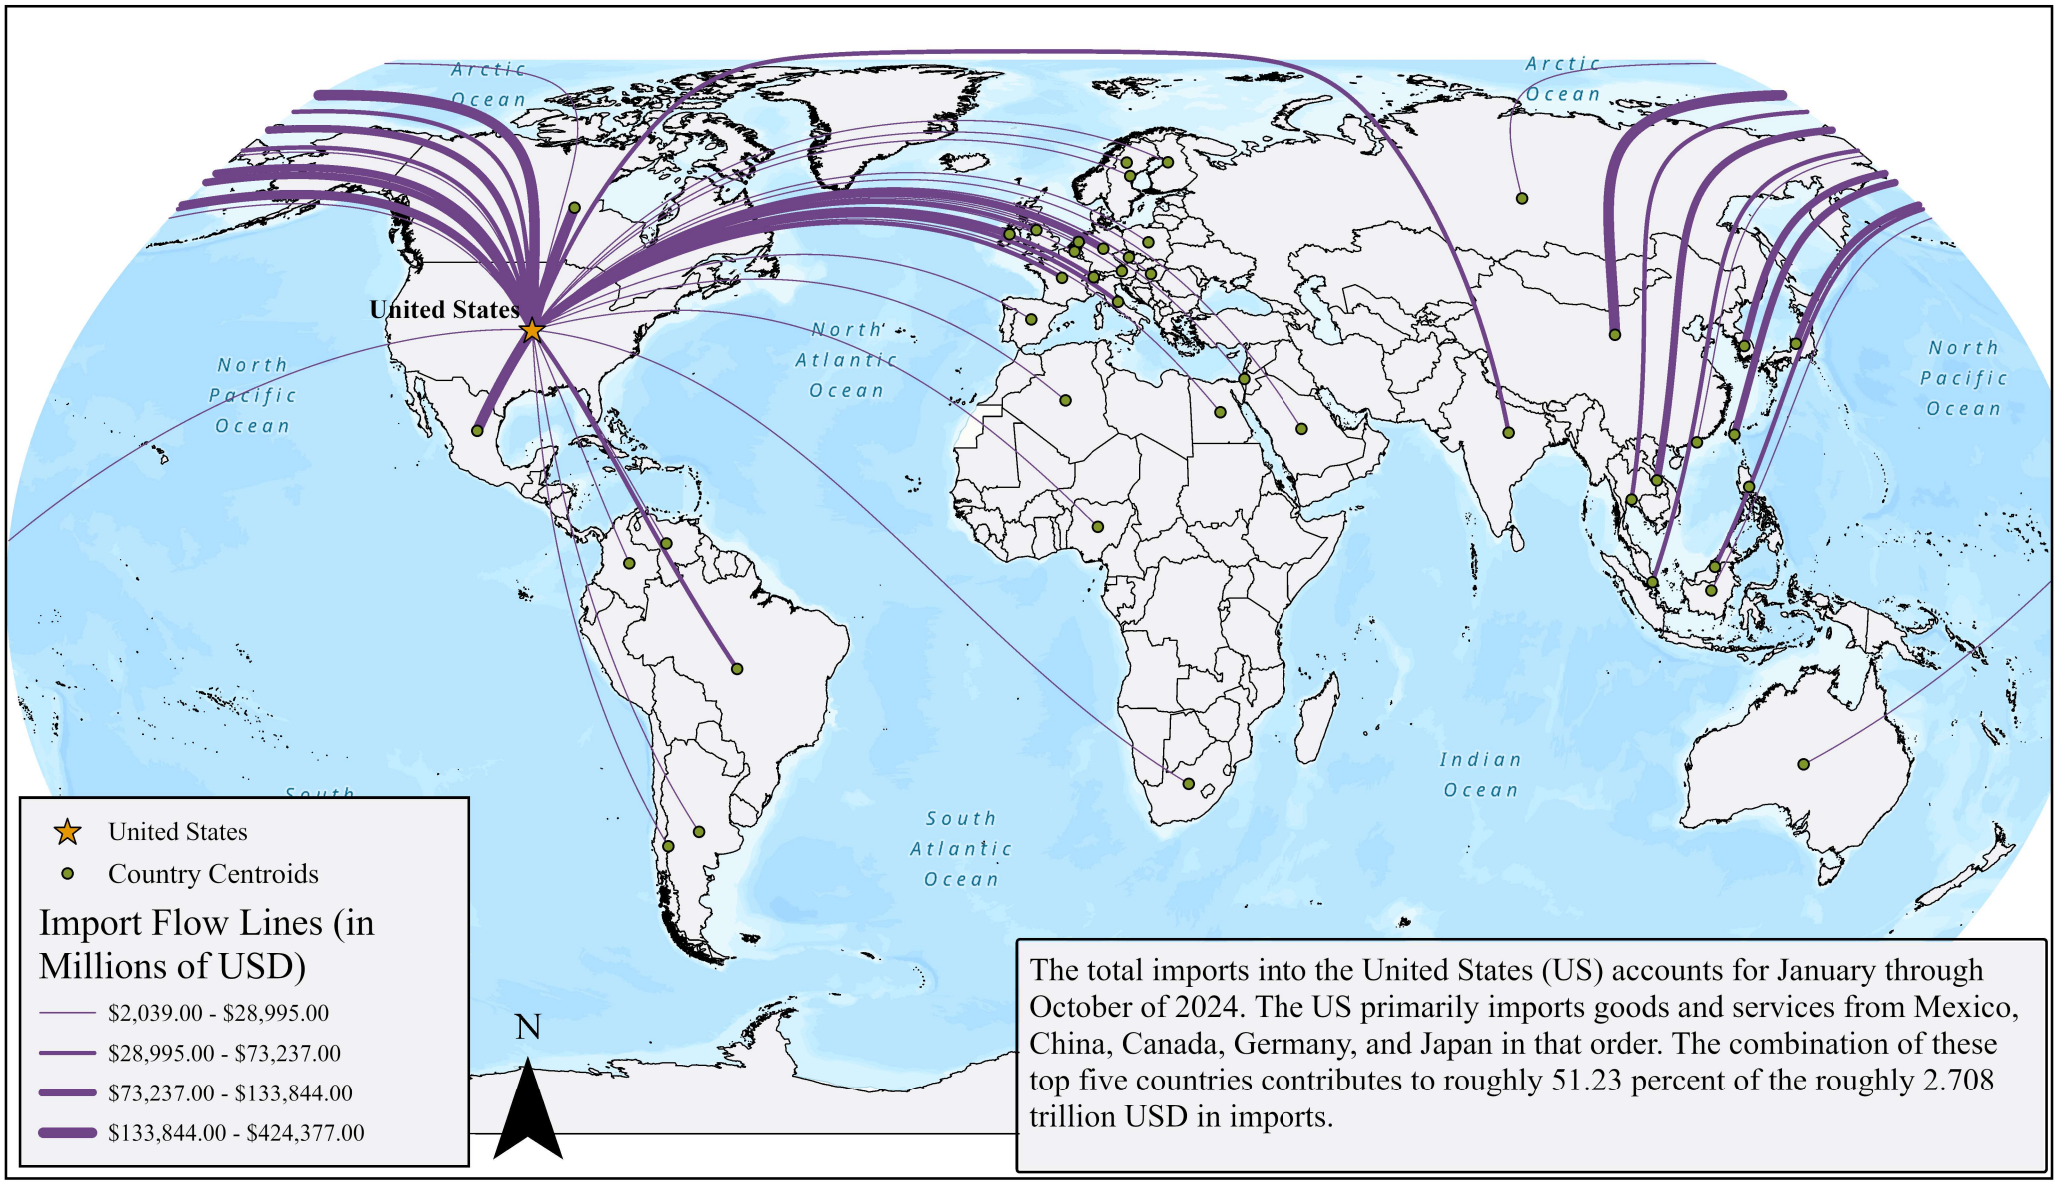
United States Flow Map Visualizing the 2024 Top Destinations of Imports in Millions of United States Dollars (USD)



The total imports into the United States (US) accounts for January through October of 2024. The US primarily imports goods and services from Mexico, China, Canada, Germany, and Japan in that order. The combination of these top five countries contributes to roughly 51.23 percent of the roughly 2.708 trillion USD in imports.
